

## PENTHOUSE PERFECTION

"This kitchen is set in a new penthouse apartment with amazing views. The owner entertains often so our brief was to create a kitchen to suit her lifestyle. We've combined an efficient and practical layout with storage solutions and fittings to make entertaining easy. The sheer size of the kitchen allowed us to add in a few extra appliances such as warming drawers, an in-wall coffee machine and a second oven. The integrated Miele fridge-freezer is concealed in a joinery wall finished in timber veneer and a Vintec wine fridge is the only item under the island bench. This allows guests to mill around both sides of the island while the host prepares the meal. We selected the timber veneer and two-pack paint to complement the natural colour variation of the NSW spotted gum floor. Crisp white stone benchtops and the reflective glass splashback give the kitchen a final touch of glamour."

**Designer: Jess O'Shea for The Maker**

*We love the tone-on-tone colour palette and reflective grey splashback.*

**EXPERT TIP**

Define zones by using blocks of colour or a second finish.
